PRAVEEN KUMAR S

Software Developer | Full Stack Developer | AI Engineer

+91 73582 57338 • praveensankar3333@gmail.com • Chennai, Tamil Nadu

GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer who makes deliberate architectural decisions around AI. Chose local LLM inference over cloud APIs to build a fully offline, zero-cost AI assistant, with a focus on evaluating trade-offs before implementation. Separately shipped a Gemini-powered code analysis tool. Transitioned from Biomedical Engineering, bringing a systems-thinking mindset and a proven ability to learn fast and ship working solutions.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS
Backend: Python, Django, Django REST Framework, REST APIs
Databases: PostgreSQL, SQLite
AI & LLM: Ollama (Qwen 4B, Phi), Google Gemini API, Prompt Engineering
Tools & DevOps: Git, GitHub, CI/CD (Vercel), VS Code

PROJECTS / PRACTICAL EXPERIENCE

Privacy-First Local LLM Orchestration Engine | Open-Source Project *Feb 2026*

Tech Stack: *Django REST Framework, React.js, Ollama (Qwen 4B)*

- Architected a fully offline AI engine powered by a local LLM (Qwen 4B via Ollama). Reduced the API cost to zero and maximizing data privacy, featuring a ChatGPT-style React UI with persistent session memory, real-time chat, zero cloud dependency.
- Eliminated third-party orchestration overhead by building a custom Django REST layer for message routing, session state, and LLM inference.

AI-Powered Code Intelligence Studio (Generate, Explain, Debug) | Open-Source Project *Jan 2026*

Tech Stack: *React.js, Django, JavaScript, Python, Gemini API (gemini-2.5-flash)*

- Built a tri-mode code intelligence engine — 'Generate' generates code from a prompt, 'Explain' dissects logic in code, 'Debug' pinpoints bugs and surfaces fixes via Gemini 2.5 Flash and Django REST in < 5 seconds.
- Designed the React frontend for zero page reloads and instant mode switching. Tested across Python, JavaScript, C++, Java, and PHP to validate prompt stability across language paradigms.

Full-Stack Social Microblogging Platform with Django Allauth | Personal Project *Nov 2025*

Tech Stack: *Django, Python, SQLite, MVT Architecture*

- Engineered a full stack microblogging platform with Django-allauth handling registration, login, and session lifecycle, keeping the entire auth flow under framework-native control ensuring secure session management.
- Modeled normalized database schemas with ownership-based access control, enabling post creation, follow/unfollow relationships, and enforcing that only post authors can delete their own content.

EDUCATION

B.Tech — Biomedical Engineering | Dr. M.G.R. Educational and Research Institute. *2021 - 2025*

CGPA: 8.4 / 10 | Chennai, Tamil Nadu.

ADDITIONAL

- Engineered a Movie Browser Application using React.js and TMBD API and Deployed it in vercel (Live Demo)
- Architected a Weather Fetcher App using React.js and Open-meteo API and Deployed it in vercel (Live Demo)

Languages: English (Fluent), Tamil (Native)
