PROFESSIONAL SUMMARY

Full Stack Developer who makes deliberate architectural decisions around AI. Chose local LLM inference over cloud APIs to build a fully offline, zero-cost AI assistant — understanding the trade-offs before writing a line of code. Separately shipped a Gemini-powered code analysis tool. React, Django, Python, end to end. Self-taught from Biomedical Engineering — I learn fast, I build intentionally, and I ship.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+)
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
Backend: Django, Django REST Framework
AI & LLM: Ollama (Qwen 4B), Google Gemini API, Prompt Engineering
Databases: PostgreSQL, SQLite
Tools & DevOps: Git, GitHub, CI/CD, Vercel, VS Code

PROJECTS

Personal AI Assistant using Local LLM | Personal Project *Feb 2026*

Tech Stack: *Django REST Framework, React.js, Ollama (Qwen 4B)*

- Architected a fully offline AI assistant powered by a local LLM (Qwen 4B via Ollama) reducing the API cost to zero and ensuring 100% data privacy — featuring a ChatGPT-style React UI with persistent session memory, real-time chat, zero cloud dependency.
- Engineered a Django REST backend to manage and handle real-time message routing, session state, and LLM inference coordination.

AI Code Explainer Web Application | Personal Project *Jan 2026*

Tech Stack: *React.js, Django, Python, JavaScript, Gemini API (gemini-2.5-flash)*

- Built a full-stack app using Gemini 2.5 Flash that accepts user code and returns structured, step-by-step AI explanations in under 5 seconds via secure Django REST backend.
- Tested across languages (Python, JavaScript, C++) and delivered a responsive React frontend where developers paste code and instantly receive AI-generated walkthroughs — cutting onboarding friction.

Social Microblogging Platform | Personal Project *Dec 2025*

Tech Stack: *Django, Python, SQLite, MVT Architecture*

- Built a full-featured social platform (Django MVT) with user posts, feeds, CRUD management, and secure authentication with zero third-party auth libraries — registration, login, and session lifecycle.
- Designed normalized database models with role-based access control— only post owners can delete their content, ensuring data integrity and clean permission boundaries.

EDUCATION

B.Tech — Biomedical Engineering | Dr. M.G.R. Educational and Research Institute, Chennai *2021 – 2025*

CGPA: 8.4 / 10

CERTIFICATIONS & LANGUAGES

Certification: Full Stack Development Bootcamp — Udemy, 2025
Languages: English (Fluent), Tamil (Native)
