PRAVEEN KUMAR S

Software Developer | Full Stack Developer | AI Engineer

+91 73582 57338 • praveensankar3333@gmail.com • Chennai, Tamil Nadu

GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer who makes deliberate architectural decisions around AI. Chose local LLM inference over cloud APIs to build a fully offline, zero-cost AI assistant, with a focus on evaluating trade-offs before implementation. Separately shipped a Gemini-powered code analysis tool. Transitioned from Biomedical Engineering, proof that I learn fast, reason through constraints, and build things that actually work.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+) , React.js, HTML5, CSS3, Tailwind CSS, jQuery
Backend: Python, Django, Django REST Framework
Databases: PostgreSQL, SQLite
AI & LLM: Ollama (Qwen 4B), Google Gemini API, Prompt Engineering
Tools & DevOps: Git, GitHub, CI/CD, Vercel, VS Code

PROJECTS / PRACTICAL EXPERIENCE

NullVoid – Local LLM Orchestration Engine with Zero Cloud Dependency | Personal Project *Feb 2026*

Tech Stack: *Django REST Framework, React.js, Ollama (Qwen 4B)*

- Architected a fully offline AI assistant powered by a local LLM (Qwen 4B via Ollama) reducing the API cost to zero and ensuring 100% data privacy, featuring a ChatGPT-style React UI with persistent session memory, real-time chat, zero cloud dependency.
- Built the Django REST backend to coordinate real-time message routing, session state, and LLM inference with no middleware or third-party orchestration layer.

CodeInsight – Real Time AI Code Intelligence Engine (Write, Explain, Debug) | Personal Project *Jan 2026*

Tech Stack: *React.js, Django, Python, JavaScript, Gemini API (gemini-2.5-flash)*

- Built a tri-mode code analysis tool — 'Write' generates code from a prompt, 'Explain' dissects logic, 'Debug' pinpoints bugs and surfaces fixes via Gemini 2.5 Flash and Django REST in < 5 seconds.
- Designed the React frontend for zero page reloads and instant mode-switching. Tested across Python, JavaScript, C++, Java, and PHP to validate prompt stability across language paradigms.

Opinions – Django Based Social Microblogging Platform| Personal Project *Dec 2025*

Tech Stack: *Django, Python, SQLite, MVT Architecture*

- Built a Social Microblogging platform and its authentication from scratch, registration, login, and full session lifecycle all without any third-party auth library, keeping the entire user flow under direct control.
- Modeled normalized database schemas with ownership-based access control, enforcing that only post authors can delete their content with clean permission logic using Django all-auth.

EDUCATION

B.Tech — Biomedical Engineering | Dr. M.G.R. Educational and Research Institute. *2021 - 2025*

CGPA: 8.4 / 10 | Chennai, Tamil Nadu.

ADDITIONAL

- Engineered a Movie Browser Application using React.js and TMBD API and Deployed it in vercel (Live Demo)
- Architected a Weather Fetcher App using React.js and Open-meteo API and Deployed it in vercel (Live Demo)

Languages: English (Fluent), Tamil (Native)
