PRAVEEN KUMAR S

Software Engineer | Full Stack Developer | AI Developer

+91 73582 57338 • praveensankar3333@gmail.com • Chennai, Tamil Nadu

GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer who makes deliberate architectural decisions around AI. Chose local LLM inference over cloud APIs to build a fully offline, zero-cost AI assistant — understanding the trade-offs before writing a line of code. Separately shipped a Gemini-powered code analysis tool. React, Django, Python, end to end. Transitioned from Biomedical Engineering — I learn fast, I build intentionally, and I ship.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+)
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
Backend: Django, Django REST Framework
AI & LLM: Ollama (Qwen 4B), Google Gemini API, Prompt Engineering
Databases: PostgreSQL, SQLite
Tools & DevOps: Git, GitHub, CI/CD, Vercel, VS Code

PROJECTS / EXPERIENCE

Personal AI Assistant using Local LLM | Personal Project *Feb 2026*

Tech Stack: *Django REST Framework, React.js, Ollama (Qwen 4B)*

- Architected a fully offline AI assistant powered by a local LLM (Qwen 4B via Ollama) reducing the API cost to zero and ensuring 100% data privacy — featuring a ChatGPT-style React UI with persistent session memory, real-time chat, zero cloud dependency.
- Engineered a Django REST backend to manage and handle real-time message routing, session state, and LLM inference coordination.

AI Code Writer, Explainer & Debugger | Personal Project *Jan 2026*

Tech Stack: *React.js, Django, Python, JavaScript, Gemini API (gemini-2.5-flash)*

- Built a tri-mode code analysis tool — *Write* generates code from a prompt, *Explain* dissects logic, *Debug* pinpoints bugs and surfaces fixes — with real-time streaming output via Gemini 2.5 Flash and Django REST.
- Architected the React frontend as a developer-first interface: live code input, mode-switched AI output, zero page reloads — validated across languages (Python, Java, JavaScript, C, C++, Rust, Go, Ruby).

Social Microblogging Platform | Personal Project *Dec 2025*

Tech Stack: *Django, Python, SQLite, MVT Architecture*

- Built a full-featured Django MVT social platform with user posts, feeds, CRUD management, and secure authentication with zero third-party auth libraries — registration, login, and session lifecycle.
- Designed normalized database models with role-based access control— only post owners can delete their content, ensuring data integrity and clean permission boundaries.

EDUCATION

B.Tech — Biomedical Engineering | Dr. M.G.R. Educational and Research Institute, Chennai *2021 – 2025*

CGPA: 8.4 / 10

CERTIFICATIONS & LANGUAGES

Certification: Full Stack Development Bootcamp — Udemy, 2025
Languages: English (Fluent), Tamil (Native)
