

PRAVEEN KUMAR S

Software Engineer | Full Stack Developer | AI Enthusiast

+91 73582 57338 • praveensankar3333@gmail.com • Chennai, Tamil Nadu

[GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer specialized in AI and proficient in Data Structures and Algorithms. Chose local LLM inference over cloud APIs to build a fully offline, zero-cost AI assistant, with a focus on evaluating trade-offs before implementation. Separately shipped an AI-powered Coding Intelligence Studio. Transitioned from Biomedical Engineering, bringing a systems-thinking mindset and the ability to learn fast and deliver working software.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Django, Django REST Framework, REST APIs

Databases: PostgreSQL, SQLite

AI & LLM: Ollama (Qwen, Phi, Mistral, Llama), Prompt Engineering, Google Gemini API

Tools & DevOps: Git, GitHub, CI/CD (Vercel), VS Code

PROJECTS / PRACTICAL EXPERIENCE

Privacy-First Local LLM Orchestration Engine | Personal Project

Feb 2026

Tech Stack: Django REST Framework, React.js, Ollama (Qwen 4B, Phi)

- Architected a fully offline AI engine powered by a local LLM (Qwen 4B via Ollama). Reduced the API cost to absolute zero and maximized the user data privacy and security with complete autonomy.
- Built a ChatGPT-style React UI with persistent session memory, real-time chat with zero cloud dependency.
- Eliminated third-party orchestration overhead by building and managing a robust production-ready custom Django REST layer for message routing, session state, and LLM inference with seamless reliability.

AI-Powered Coding Intelligence Studio (Generate, Explain, Debug) | Personal Project

Jan 2026

Tech Stack: React.js, Django, JavaScript, Python, Gemini API (gemini-2.5-flash)

- Built a tri-mode code intelligence engine — 'GENERATE' generates code from a prompt, 'EXPLAIN' dissects logic in code, 'DEBUG' pinpoints bugs and surfaces fixes via Gemini 2.5 Flash and Django REST in < 5 seconds.
- Designed the React frontend for zero page reloads and instant mode switching. Tested across Python, JavaScript, C++, Java, and PHP to validate prompt stability across language paradigms.

Full-Stack Social Microblogging Platform with Django Allauth | Open-Source Project

Nov 2025

Tech Stack: Django, Python, SQLite, MVT Architecture

- Engineered a Full Stack microblogging platform with Django-allauth handling registration, login, and session lifecycle, keeping the entire auth flow under framework-native control ensuring secure session management.
- Modeled normalized database schemas with ownership-based access control, enabling post creation, follow/unfollow users, and enforcing that only the post authors have control over their own content.

GitHub: github.com/PraveenSankar03/django-social-media

ADDITIONAL / DEPLOYED PROJECTS

- Engineered a Movie Browser Application using React.js and TMDB API and Deployed it in vercel ([Live Demo](#))
- Architected a Weather Fetcher App using React.js and Open-Meteo API and Deployed it in vercel ([Live Demo](#))

EDUCATION

B.Tech — Biomedical Engineering | Dr. M.G.R. Educational and Research Institute.

2021 – 2025

CGPA: 8.4 / 10 | Chennai, Tamil Nadu.
